Platform Pricing Committee
Result-Cache Pricing Bulletin Q4-26 (adopted for plan QA26-Q4)
Applies to cache capacity planning for the plan named above and later plans.
This bulletin withdraws Table R-1 of the Q3 bulletin and the scan rates digest draft.
Table R-2 gives, per family and cluster, the scan rate and the cache node rate.
Both rates are in cents per normalized unit (scan) and per normalized unit-hour (node), four decimals.
Table E-1 lists errata to Table R-2, applied in ascending erratum_id order; IN FORCE replaces the named rate.
A RESCINDED erratum has no effect.
Table C-1 records committee rulings on existing reservations by reservation id.
A CANCELLED reservation no longer exists for planning.
An EXTENDED reservation ends at the revised UTC time shown instead of its inventory end.
Table M-1 gives the minimum node commitment of each cluster. Table M-0 is superseded by Table M-1.
