PD-RETAIL v4 model documentation

Scores run from 300 to 1199; a higher score means lower risk. The score band cut points of each segment are listed below; band 1 is score <= c1 and band 10 is score > c9.

The calibration grid gives the probability of default for every segment and score.

Approved model versions: v4.0.0 all segments from 2024-10-01; v4.0.1 CARD and BNPL from 2025-02-01; v4.0.2 CARD, PLOAN and OVDR from 2025-03-01 (the registry is authoritative).

Score band cut points
