SNLSQ DATUM AUTHORITY RECORD
Minimal-constraint datum for the district sensor network adjustment.
Constrained components: ALPHA.x (idx 0), ALPHA.y (idx 1), FICUS.x (idx 10).
Every component not listed above is a FREE unknown.
The constrained-component count u is recorded in the control workbook (xlsx).
Robust reweighting uses the tuning constant k from the control workbook (xlsx).
Per-observation authority index follows (obs_id | district | epoch | authorised):
